

SUGPIAT DEFENSE, LLC

SBA 8(a) Certified

CYBERSECURITY

Alaska Native Corporation | Small Disadvantaged Business

Sugpiat Defense understands Cybersecurity requires a persistent effort and culture to align people, processes, tools, and technology.

We offer more than just a standard “Perimeter, Patch, and Pray” network security service offering. Sugpiat Defense has direct experience implementing cybersecurity controls for operational systems, industrial systems, cloud-based platforms, mobile devices, Internet of Things networks, aviation platforms, wearable technology, and other non-standard IT use-cases.

Our team of IAM Level III and IAT Level III certified professionals have the expertise needed to identify and mitigate cyber risks before they become organizational issues. We specialize in cyber policy and governance, security engineering, network and system hardening, penetration testing, incident response, and disaster recovery to provide decision-makers with the assurances needed for mission success. We tailor cybersecurity services to the needs of your mission to enable the most cost-effective strategy for data confidentiality, integrity, and availability.

We focus on proactive measures while implementing comprehensive monitoring and rapid response to cyber threats. Regardless of the platform or mission context, we can assist with your cybersecurity needs.
